

Ollama

Start building with open models.

Download

macOS

```
curl -fsSL https://ollama.com/install.sh | sh
```

or download manually

Windows

```
irm https://ollama.com/install.ps1 | iex
```

or download manually

Linux

```
curl -fsSL https://ollama.com/install.sh | sh
```

Manual install instructions

Docker

The official Ollama Docker image `ollama/ollama` is available on Docker Hub.

Libraries

- ollama-python
- ollama-js

Community

- Discord
- 𝕏 (Twitter)
- Reddit

Get started

```
ollama
```

You'll be prompted to run a model or connect Ollama to your existing agents or applications such as `Claude Code`, `OpenClaw`, `OpenCode` , `Codex`, `Copilot`, and more.

Coding

To launch a specific integration:

```
ollama launch claude
```

Supported integrations include Claude Code, Codex, Copilot CLI, DeepSeek Harness, Droid, and OpenCode.

AI assistant

Use OpenClaw to turn Ollama into a personal AI assistant across WhatsApp, Telegram, Slack, Discord, and more:

```
ollama launch openclaw
```

Chat with a model

Run and chat with Gemma 4:

```
ollama run gemma4
```

See ollama.com/library for the full list.

See the quickstart guide for more details.

REST API

Ollama has a REST API for running and managing models.

```
curl http://localhost:11434/api/chat -d '{
  "model": "gemma4",
  "messages": [{
    "role": "user",
    "content": "Why is the sky blue?"
  }],
  "stream": false
}'
```

See the API documentation for all endpoints.

Python

```
pip install ollama
```

```
from ollama import chat

response = chat(model='gemma4', messages=[
  {
    'role': 'user',
    'content': 'Why is the sky blue?',
  },
])
print(response.message.content)
```

JavaScript

```
npm i ollama
```

```
import ollama from "ollama";

const response = await ollama.chat({
  model: "gemma4",
  messages: [{ role: "user", content: "Why is the sky blue?" }],
});
console.log(response.message.content);
```

Supported backends

- llama.cpp project founded by Georgi Gerganov.

Documentation

- CLI reference
- REST API reference
- Importing models
- Modelfile reference
- Building from source

Chat Interfaces

Web

- Open WebUI - Extensible, self-hosted AI interface
- Onyx - Connected AI workspace
- LibreChat - Enhanced ChatGPT clone with multi-provider support
- Lobe Chat - Modern chat framework with plugin ecosystem (docs)
- NextChat - Cross-platform ChatGPT UI (docs)
- Perplexica - AI-powered search engine, open-source Perplexity alternative
- big-AGI - AI suite for professionals
- Lollms WebUI - Multi-model web interface
- ChatOllama - Chatbot with knowledge bases
- Bionic GPT - On-premise AI platform
- Chatbot UI - ChatGPT-style web interface
- Hollama - Minimal web interface
- Chatbox - Desktop and web AI client
- chat - Chat web app for teams
- Ollama RAG Chatbot - Chat with multiple PDFs using RAG
- Tkinter-based client - Python desktop client

Desktop

- Dify.AI - LLM app development platform
- AnythingLLM - All-in-one AI app for Mac, Windows, and Linux
- Maid - Cross-platform mobile and desktop client
- Witsy - AI desktop app for Mac, Windows, and Linux
- Cherry Studio - Multi-provider desktop client

- Ollama App - Multi-platform client for desktop and mobile
- PyGPT - AI desktop assistant for Linux, Windows, and Mac
- Alpaca - GTK4 client for Linux and macOS
- SwiftChat - Cross-platform including iOS, Android, and Apple Vision Pro
- Enchanted - Native macOS and iOS client
- RWKV-Runner - Multi-model desktop runner
- Ollama Grid Search - Evaluate and compare models
- macai - macOS client for Ollama and ChatGPT
- AI Studio - Multi-provider desktop IDE
- Reins - Parameter tuning and reasoning model support
- ConfiChat - Privacy-focused with optional encryption
- LLocal.in - Electron desktop client
- MindMac - AI chat client for Mac
- Msty - Multi-model desktop client
- BoltAI for Mac - AI chat client for Mac
- IntelliBar - AI-powered assistant for macOS
- Kerlig AI - AI writing assistant for macOS
- Hillnote - Markdown-first AI workspace
- Perfect Memory AI - Productivity AI personalized by screen and meeting history

Mobile

- Ollama Android Chat - One-click Ollama on Android

> SwiftChat, Enchanted, Maid, Ollama App, Reins, and ConfiChat listed above also support mobile platforms.

Code Editors & Development

- Cline - VS Code extension for multi-file/whole-repo coding
- Continue - Open-source AI code assistant for any IDE
- Void - Open source AI code editor, Cursor alternative
- Copilot for Obsidian - AI assistant for Obsidian
- twinny - Copilot and Copilot chat alternative
- gptel Emacs client - LLM client for Emacs
- Ollama Copilot - Use Ollama as GitHub Copilot
- Obsidian Local GPT - Local AI for Obsidian
- Ellama Emacs client - LLM tool for Emacs
- orbiton - Config-free text editor with Ollama tab completion
- AI ST Completion - Sublime Text 4 AI assistant
- VT Code - Rust-based terminal coding agent with Tree-sitter
- QodeAssist - AI coding assistant for Qt Creator
- AI Toolkit for VS Code - Microsoft-official VS Code extension
- Open Interpreter - Natural language interface for computers

Libraries & SDKs

- LiteLLM - Unified API for 100+ LLM providers
- Semantic Kernel - Microsoft AI orchestration SDK
- LangChain4j - Java LangChain (example)
- LangChainGo - Go LangChain (example)
- Spring AI - Spring framework AI support (docs)
- LangChain and LangChain.js with example
- Ollama for Ruby - Ruby LLM library
- any-llm - Unified LLM interface by Mozilla
- OllamaSharp for .NET - .NET SDK
- LangChainRust - Rust LangChain (example)
- Agents-Flex for Java - Java agent framework (example)
- Elixir LangChain - Elixir LangChain
- Ollama-rs for Rust - Rust SDK
- LangChain for .NET - .NET LangChain (example)
- chromem-go - Go vector database with Ollama embeddings (example)
- LangChainDart - Dart LangChain
- LlmTornado - Unified C# interface for multiple inference APIs
- Ollama4j for Java - Java SDK
- Ollama for Laravel - Laravel integration
- Ollama for Swift - Swift SDK
- LlamaIndex and LlamaIndexTS - Data framework for LLM apps
- Haystack - AI pipeline framework
- Firebase Genkit - Google AI framework
- Ollama-hpp for C++ - C++ SDK
- PromptingTools.jl - Julia LLM toolkit (example)
- Ollama for R - rollama - R SDK
- Portkey - AI gateway
- Testcontainers - Container-based testing
- LLPhant - PHP AI framework

Frameworks & Agents

- AutoGPT - Autonomous AI agent platform
- crewAI - Multi-agent orchestration framework
- Strands Agents - Model-driven agent building by AWS
- Cheshire Cat - AI assistant framework
- any-agent - Unified agent framework interface by Mozilla
- Stakpak - Open source DevOps agent
- Hexabot - Conversational AI builder
- Neuro SAN - Multi-agent orchestration (docs)

RAG & Knowledge Bases

- RAGFlow - RAG engine based on deep document understanding
- R2R - Open-source RAG engine
- MaxKB - Ready-to-use RAG chatbot
- Minima - On-premises or fully local RAG
- Chipper - AI interface with Haystack RAG
- ARGO - RAG and deep research on Mac/Windows/Linux
- Archyve - RAG-enabling document library
- Casibase - AI knowledge base with RAG and SSO
- BrainSoup - Native client with RAG and multi-agent automation

Bots & Messaging

- LangBot - Multi-platform messaging bots with agents and RAG
- AstrBot - Multi-platform chatbot with RAG and plugins
- Discord-Ollama Chat Bot - TypeScript Discord bot
- Ollama Telegram Bot - Telegram bot
- LLM Telegram Bot - Telegram bot for roleplay

Terminal & CLI

- aichat - All-in-one LLM CLI with Shell Assistant, RAG, and AI tools
- oterm - Terminal client for Ollama
- gollama - Go-based model manager for Ollama
- tlm - Local shell copilot
- tenere - TUI for LLMs
- ParLlama - TUI for Ollama
- llm-ollama - Plugin for Datasette's LLM CLI
- ShellOracle - Shell command suggestions
- LLM-X - Progressive web app for LLMs
- cmdh - Natural language to shell commands
- VT - Minimal multimodal AI chat app

Productivity & Apps

- AppFlowy - AI collaborative workspace, self-hostable Notion alternative
- Screenpipe - 24/7 screen and mic recording with AI-powered search
- Vibe - Transcribe and analyze meetings
- Page Assist - Chrome extension for AI-powered browsing
- NativeMind - Private, on-device browser AI assistant
- Ollama Fortress - Security proxy for Ollama
- 1Panel - Web-based Linux server management
- Writeopia - Text editor with Ollama integration
- QA-Pilot - GitHub code repository understanding
- Raycast extension - Ollama in Raycast
- Painting Droid - Painting app with AI integrations
- Serene Pub - AI roleplaying app

- Mayan EDMS - Document management with Ollama workflows
- TagSpaces - File management with AI tagging

Observability & Monitoring

- Opik - Debug, evaluate, and monitor LLM applications
- OpenLIT - OpenTelemetry-native monitoring for Ollama and GPUs
- Lunary - LLM observability with analytics and PII masking
- Langfuse - Open source LLM observability
- HoneyHive - AI observability and evaluation for agents
- MLflow Tracing - Open source LLM observability

Database & Embeddings

- pgai - PostgreSQL as a vector database (guide)
- MindsDB - Connect Ollama with 200+ data platforms
- chromem-go - Embeddable vector database for Go (example)
- Kangaroo - AI-powered SQL client

Infrastructure & Deployment

Cloud

- Google Cloud
- Fly.io
- Koyeb
- Harbor - Containerized LLM toolkit with Ollama as default backend

Package Managers

- Pacman
- Homebrew
- Nix package
- Helm Chart
- Gentoo
- Flox
- Guix channel
